Dynamic Modeling Of Musculoskeletal Motion A Vectorized Approach For Biomechanical Ysis In Three

The course includes the quantitative analysis of human motion through the musculoskeletal system. The course provides students with the tools to perform musculoskeletal dynamic modeling, and includes instruction on advanced techniques such as biomechanical modeling and computer-aided design in musculoskeletal system. Dr. Kozey's research and expert in the areas of shoulder and knee injuries and musculoskeletal disease. He has also served as the NY Giants emeritus Dr. Cheryl Kozey.

Research interests: The Innovation in Musculoskeletal Health and Physical activity... research and expert in the areas of shoulder and knee injuries and musculoskeletal disease. He has also served as the NY Giants emeritus...
